PROFILE

Computer Science Graduate Seeking Junior or Internship Role in Technology

Recent Computer Science graduate from McGill University in Montreal, seeking a junior role or internship in technology. Excited to apply my skills in software development, data analysis, and web technologies. Proficient in JavaScript, React, ReactNative, Next.js, HTML, CSS, Nodejs, Python, and SQL. Experienced with cloud services, API integrations, and version control with Git.

EMPLOYMENT HISTORY

Oct 2024 — Present

Web Developer (Freelance), CApi, New Milanes

Montreal

Developed an e-commerce store for New Milanes, an menswear brand based in Italy.

Collaborating with CApi, a creative agency, to develop site. Leveraged WooCommerce and the Flatsome theme to deliver a high-performing, secure platform. Key contributions include:

- **Security:** Set up automated backups and implemented advanced threat protection.
- **Performance:** Optimized site load times using GTmetrix and Lighthouse.
- **Maintenance and Updates:** performing maintenance and content updates regularly.
- **SEO:** Applied best practices, including schema markup and improved site structure, resulting in an increase in organic traffic.
- **Internationalization:** Enabled multilingual functionality for English and Italian.
- **GDPR Compliance:** Integrated for cookie management and ensured full compliance with user data regulations.
- **Budget Management:** Tracked project costs and ensured budget adherence by identifying cost-effective solutions, delivering transparency through regular updates to stakeholders.
- **Collaboration:** Worked closely with designers and content teams to align development with branding and user experience goals.

Jan 2022 — Jul 2023

Junior Software Engineer (Remote), MyWallet

Warsaw

Key Achievements:

- **ReactNative Mobile App Localization:** Identified localization requirements for UI/UX and regional features (e.g., date formats, currency symbols).
Tested localized app versions to ensure accurate display and functionality across languages and regions.
- **User Website Development:**
 - **Frontend:** Built responsive user interfaces with React and Next.js, ensuring seamless cross-device usability.
 - **Backend:**
 - Integrated Azure ADB2C for multi-user authentication and authorization.
 - Linked Azure SQL database for efficient data storage and retrieval.
- **B2B Backend Communication for Receipt Sharing:** Helped to design secure APIs for receipt sharing across B2B2C systems.
Managed data synchronization and implemented logging/monitoring for API requests.

Technical Skills & Tools:

- **Azure Services:** Hands-on experience with Azure SQL databases, ADB2C, and Azure IoT Hub.
- **Web Security:** Familiar with secure API design, data encryption, and best practices for performance and efficiency.
- **Hybrid Cloud & Blockchain:** Basic knowledge of hybrid cloud architecture and blockchain implementation.
